

Alexander Klement

Senior Designer

Profile

I'm a hands on senior creative designer with all-round experience from branding and identity to motion graphics, typography and advertising. Passionate about all aspects of design, I have a keen eye for detail and am always seeking perfection in my work, I am constantly learning new techniques and technologies that allow me to push the boundaries of what I can achieve.

Not just a designer, I am a creative thinker that feels at home pushing ideas further and experimenting with concepts to explore what's possible. I'm keen to work with both agencies and clients to produce great design that is effective and creates impact.
